

I have been a supporter of XM since it launched in Florida and have spent my hard earned money on this product for you to come and try to stop something that does not affect anybody..... So XM provides some of the same services as local radios the only difference is that we want to pay for a service that is design for the consumers and not the CEO's of all the others radio stations that only provide what little amount of music and or news that they consider important.....

Also try listening to any of this early shows in radio and you want to drive your to a wall.....Let me and the rest of XM Radio listeners enjoy our product that we pay for and I hope You understand the part that we PAY FOR, enjoy what XM wants to provide if You have a problem get better service on FM and AM considerind that in order to receive your HD FM radio service coming soon You want people to pay \$400.00 to upgrade their system but not upgrading the quality of programing.....I will pay extra so XM could pay all the cry babies that are trying to stop their service.....
